

***Electrical Wizard: How Nikola Tesla Lit up the World***  
by Elizabeth Rusch

**R.2 Central Ideas/Themes**

Harnessing electricity is like wizardry.

**R.4 Word Choice**

Find and list all the words related to wizardry or magic. What role do these words play in the book?

**R.5 Structure**

If you read the author's note, it is clear that Tesla invented many things that affect our lives. Why did the author focus only the development of the AC system in the main text? How would including more inventions in the main text have changed the book? Make a list of the scenes in the book. For each scene write why the author might have included that scene.

**R.6 Point of View**

The book focuses on Tesla's point of view. How would it have been different if the author had chosen to give equal time to Tesla's and Edison's point of view? Which inventor did you know more about before reading *Electrical Wizard*? How might this have affected the author's decision to focus on Tesla?

**R.7 Diverse Media and Formats/Pair with:**

PBS's *Master of Lightning*

**R.9 Multiple Texts/Pair with:**

*Nikola Tesla: A Spark of Genius* by Carol Dommermuth-Costa  
*Nikola Tesla and the Taming of Electricity* by Lisa J. Aldrich  
Books on Edison
